- Being polite and respectful to all staff, officials, competitors, volunteers, as well as fans and supporters
- Never engaging in or tolerating offensive, insulting or abusive language or behaviour.
- Respecting my team mates, competitors from other teams and all other participants.

As a competitor I agree to demonstrate INTEGRITY by:

- Always taking part to the best of my ability.
- Behaving responsibly.
- Raising concerns when something isn't right and reporting any incidents of bullying to an Officer of the club or to Motorsport UK.

As a competitor I agree to demonstrate FAIR PLAY by:

- Respecting the rules and regulations, decisions and authority of the officials.
- Not cheating.
- · Not breaking or bending the rules

As a competitor I agree to demonstrate SELF CONTROL by:

- Always speaking to other competitors with respect.
- Always being considerate of others and appreciating that everyone has a different level of skill and talent.
- Taking responsibility for my behaviour and the way I speak to other people.

As a competitor I agree to demonstrate GOOD MANNERS by:

- Placing an emphasis on fun and enjoyment, making our sport a friendly and welcoming place to be.
- Celebrating when I win and being gracious when I lose.

In accordance with regulation 10.1. Motorsport UK reserves the right to take appropriate disciplinary action for breaches of these codes of conduct. This may include being asked to leave Motorsport UK affiliated activities and being excluded from future activities.

For organisers and events such as the AM Phillip Trucktech Snowman Rally, there is an increasing need to act on mitigating the associated environmental impacts such as the carbon footprint generated by its running. Such action is necessary to ensure the continued support of our stakeholders and the communities our event relies on. Several events have begun to take such steps to help to make motorsport and the environment more sustainable for the future.

The AM Phillip Trucktech Snowman Rally has decided as part of an environmental road map, to partner with Carbon Positive Motorsport, and to take significant steps to mitigate its carbon footprint through the purchase of carbon reduction units.

These units are sourced using only world class UK rewilding-based carbon offsetting projects certified by the Woodland Carbon Code. Such projects provide greater environmental benefits than offsetting alone and ensure that the economic benefits are retained in the UK.

The units will provide assured carbon offsetting in the future, to the equivalent of an estimated CO2e level, using UK government carbon conversion factors that correspond to the forecasted fuel consumption of the organisers and competitors vehicles on the event day.

This forecast is based on a proprietary database of actual competition and organisers vehicles fuel consumption, and will include an additional 25% offset level, to create a carbon positive level of offsetting in the long term.

Following the event, the estimated tCO2e equivalent, will be registered as Pending Issuance Units (PIUs) which provide the CRUs. This transaction will be administered by Carbon Positive Motorsport, through its partner Highland Carbon in the name of the AM Phillip Trucktech Snowman Rally 2023 and be published via IHS Markits on the UK land registry. This registration provides verification and traceability of the CRUs, their additionality, and the prevention of reselling such units.

We have included a carbon offsetting charge per competitor within our entry fees and consider this as a relatively low cost for the high quality of UK certified offsetting being provided, and in securing the benefits for the event in the future. By working as an event, we can secure a substantial discount over equivalent online pricing within this fee.

Competitors can select to opt out of this charge if wished, however the event organisers would appreciate the involvement of all competitors in this initiative in the interests of the event and our environmental roadmap agenda.
